VEGETATIO

the international journal of plant ecology

Contents Volume 121 Nos. 1/2 December 1995

Global change and terrestrial ecosystems in monsoon Asia
Guest editors: T. Hirose and B. H. Walker

Editorial 1–2

Latitudinal comparison of altitudinal changes in forest structure, leaf-type, and species richness in humid monsoon Asia
M. Ohsawa 3–10

The boreal forests of north-eastern Eurasia
S.Yu. Grishin 11–21

Composition, dynamics and disturbance regime of temperate deciduous forests in monsoon Asia
T. Nakashizuka & S. Iida 23–30

Tropical seasonal forests in monsoon Asia: With emphasis on continental southeast Asia
N. Ruangpanit 31–40

Human impacts on tropical forest dynamics
S. Riswan & L. Hartanti 41–52

Terrestrial transects for global change research
G.W. Koch, P.M. Vitousek, W.L. Steffen & B.H. Walker 53–65

Temperature effects on the photosynthetic response of C_3 plants to long-term CO_2 enrichment
R.F. Sage, J. Santrucek & D.J. Grise 67–77

Environmental regulation of surface conductance for evaporation from vegetation
E.-D. Schulze, R. Leuning & F.M. Kelliher 79–87

The basis for variation in leaf longevity of plants
K. Kikuzawa 89–100

Factors determining distributions of tree species and plant functional types
E.O. Box 101–116

A size-distribution-based model of forest dynamics along a latitudinal environmental gradient
T. Kohyama & N. Shigesada 117–126

Maintenance of forest species diversity and latitudinal gradient
Y. Iwasa, T. Kubo & K. Sato 127–134

A role-type model (rope) and its application in assessing climate change impacts on forest landscapes
Guofan Shao, H.H. Shugart & T.M. Smith 135–146

Simulation of soil carbon cycling and carbon balance following clear-cutting in a mid-temperate forest and contribution to the sink of atmospheric CO_2
K. Nakane & Nam-Juu Lee 147–156

The role of temperate trees and forests in CO_2 fixation
P.G. Jarvis 157–174
Contribution of monsoon Asia to the carbon budget of the biosphere, past and future
G. Esser 175–188
Abstracts 189–191
